

## **NEWLANDS GIRLS' SCHOOL**

### **INFORMATION TECHNOLOGY**

#### **ACCEPTABLE USE AGREEMENT - INCLUDING ADVICE TO PARENTS**

(Updated February 2019)

#### **(PARENT COPY TO KEEP)**

This agreement should be signed by new girls and their Parents/Carers when joining the school. In accordance with the General Data Protection Regulation (2018), girls are entitled to withdraw from this agreement once aged 13 or over, although please note that in doing so they withdraw from being able to use our IT resources and internet.

The school provides a significant amount of Information Technology equipment to support the curriculum and help girls extend their learning both inside and outside the classroom. Access to this equipment and these resources is a privilege which, in the event of improper use, can be withdrawn.

***Please read the following sections carefully:***

#### **Equipment**

- Only use the computers for educational purposes
- Damaging, disabling, or otherwise harming the operation of computers, or intentionally wasting resources puts your work at risk, and will cut short your time with the IT equipment.
- Always check mobile equipment (e.g. laptops, tablet PCs, PDAs etc.) with antivirus software and ensure they have been found to be clean of viruses before connecting them to the network. Always check files brought in on removable media (CDs, flash drives etc.) with antivirus software and only use them if they are found to be clean of viruses.
- Eating and drinking is expressly forbidden in any of the computer rooms, and generally forbidden in any rooms where computer equipment is to be used.

#### **Security and Privacy**

- Your student login details (username and password) are your own personal property and you are responsible for keeping them private and secure. Use them to protect your work and your email account; do not share them with anybody and never use someone else's login.
- Always be wary about revealing any personal information including your home address, telephone number, school name, or picture on the Internet.
- Once logged on, store only your own work on your area; do not store work or files for anybody else, or allow them to store work or files for you.

- To protect yourself and the systems, you should respect the security on the computers; attempting to bypass or alter the settings may put you, your work, or other girls at risk.
- Computer storage areas will be treated like school lockers. Your computer use may be reviewed by appropriate staff members to ensure that you are using the system appropriately, safely and responsibly
- Other computer users should be respected and should not be harassed, harmed, offended or insulted.

### **Internet/Intranet**

- You should only access the Internet/Intranet for school activities.
- Only access suitable material; using the Internet to obtain, download, send, print, display or otherwise transmit or gain access to materials which are unlawful, obscene or abusive is not permitted.
- Respect the work and ownership rights of people outside the school, as well as other students or staff. This includes abiding by copyright laws.
- People you contact on the Internet are not always who they seem. You should never meet with anyone contacted through the internet.

### **Email**

- Be polite and appreciate that other users might have different views from your own. The use of strong language, swearing or aggressive behaviour is as anti-social on the Internet as it is on the street.
- Only open attachments to emails if they come from someone you already know and trust. Attachments can contain viruses or other programs that could destroy all the files and software on your computer.
- If you receive an email containing material of a violent, dangerous, racist, sexual or inappropriate content, always report such messages to a member of staff. The sending or receiving of an email containing content likely to be unsuitable for children or schools is strictly forbidden.

### **Internet advice for Parents/Carers**

- Go online with your child and get involved. Search together for useful websites and get to know what Internet resources your child uses. Learn from your child and get to know their online friends.
- Be proactive and caring and warn your child about the dangers of giving out their name, address, telephone number and any other personal information, whether online or not.
- Discuss family and personal values and devise rules for responsible behaviour. Post the rules by the home computer and check to see if they are complied with. At school, teachers will guide pupils on how to use the internet safely. Outside school, families have the responsibility for such guidance.
- Use devices and the internet within full view of the family.
- It is wise to install filtering software and any parental controls that are provided by many commercial online services, but above all else be vigilant.

Please sign below and once this is returned to school, access to the Internet will be permitted. If a student violates these provisions, access to the Internet will be denied and disciplinary action will be taken. Additional action may be taken by the school in line with existing policy regarding school behaviour. When appropriate, police or local authorities may be involved.
