1. Aims

This policy aims to ensure that:

- > Pupils, staff and parents understand how our school will support pupils with medical conditions.
- > Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school trips and sporting activities.

The Full Governing Body will implement this policy by:

- > Making sure sufficient staff are suitably trained.
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions.
- > Providing supply teachers with appropriate information about the policy and relevant pupils.
- > Developing and monitoring all Healthcare Plans.

The named person with responsibility for implementing this policy is Miss J M Capon.

2. Legislation and statutory responsibilities

This policy meets the requirements under <u>Section 100 of the Children and Families Act 2014</u>, which places a duty on the Full Governing Body to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the Department for Education's statutory guidance: <u>Supporting pupils at school with</u> <u>medical conditions</u>.

3. Roles and responsibilities

3.1 The Full Governing Body

The Full Governing Body has ultimate responsibility to make arrangements to support pupils with medical conditions.

3.2 The Headteacher

The Headteacher will:

- > Make sure all staff are aware of this policy and understand their role in its implementation.
- Ensure that there are a number of trained staff available to implement this policy and deliver against all Healthcare Plans, including in contingency and emergency situations.
- > Take overall responsibility for the development of Healthcare Plans.
- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way.
- Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.
- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date.

3.3 Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach.

3.4 Parents

Parents will:

- > Provide the school with up-to-date information about their child's medical needs.
- Be involved in the development and review of their child's Healthcare Plan and may be involved in its drafting.
- Carry out any action they have agreed to as part of the implementation of the Healthcare Plan e.g. provide medicines and equipment.

3.5 Pupils

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. They are also expected to comply with their Healthcare Plans.

3.6 School nurses and other healthcare professionals

Our school nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible.

Healthcare professionals, such as GPs and pediatricians, will liaise with the school nursing team and notify them of any pupils identified as having a medical condition.

4. Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made, enabling these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk Assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents and any relevant healthcare professionals will be consulted.

5. Healthcare Plans

Note: Healthcare Plan – this can be an Individual Healthcare Plan, Allergy Action Plan (according to the type of auto-injector) or School Asthma Card (see attached Appendices).

The Headteacher has overall responsibility for the development of Healthcare Plans for pupils with medical conditions. This has been delegated to the Front Office team.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- > What needs to be done
- > When
- > By whom

Not all pupils with a medical condition will require a Healthcare Plan. If appropriate, it will be agreed with a school First Aider/healthcare professional and the parents.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional, such as the school nurse, specialist or pediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

Healthcare Plans may be linked to, or become part of an Education, Health and Care Plan (EHCP). All relevant staff would be made aware of the needs of the individual.

The following information is considered as part of a Healthcare Plan:

- > The medical condition, its triggers, signs, symptoms and treatments.
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons. (This information is also covered on our POM (Prescribed Only Medicine Form) (Appendix A) and OTC (Over the Counter Form) (Appendix B).
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring.
- Arrangements for written permission from parents for medication to be administered by a member of staff, or self-administered by the pupil during school hours.
- > Who in the school needs to be aware of the pupil's condition and the support required.
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. Risk Assessments.
- > Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition.
- > What to do in an emergency, including who to contact, and contingency arrangements.

6. Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- > When it would be detrimental to the pupil's health or school attendance not to do so and
- Where we have parents' written consent (covered by POM and OTC form). The form must be fully completed and handed to Reception by the Parent/Carer, before any medication can be administered. This also applies to replacement medicines. A new form will need to be completed each time.

The only exception to this is where the medicine has been prescribed to the pupil without the knowledge of the parents.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken.

The school will only accept prescribed medicines that are:

- > In-date
- > Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage.

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and are not locked away during school hours.

Medicines will be returned to parents to arrange for safe disposal or safely disposed of by Front Office when no longer required or have passed their expiry date.

6.1 Controlled drugs

<u>Controlled drugs</u> are prescription medicines that are controlled under the <u>Misuse of Drugs Regulations 2001</u> and subsequent amendments, such as morphine or methadone.

A pupil who has been prescribed a controlled drug may have it in their possession if they are competent to do so, but they must not pass it to another pupil to use. All other controlled drugs are kept in a secure cupboard in the School Office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept. Only trained, named, individuals can administrator this medication.

6.2 Pupils managing their own needs

Pupils will be allowed to carry their own emergency medicines and devices when relevant. Staff will not force a pupil to take a medicine or carry out a necessary procedure if they refuse, but will follow the procedure agreed in the Healthcare Plan and inform parents so that an alternative option can be considered, if necessary.

6.3 Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's Healthcare Plan, but it is generally not acceptable to:

- > Prevent pupils from easily accessing their inhalers and medication.
- > Assume that every pupil with the same condition requires the same treatment.
- > Ignore the views of the pupil or their parents.
- > Ignore medical evidence or opinion (although this may be challenged).

6.3 Unacceptable practice - continued

- Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their Healthcare Plan.
- > If the pupil becomes ill, send them to Reception unaccompanied or with someone unsuitable.
- > Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively.
- > Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life.

7. Pupils with Prolonged Absence

(A separate policy "Children who cannot attend school due to a health need" gives fuller information, and is summarized below).

The named person in school with responsibility for attendance is one of the Deputy Headteachers.

The Pastoral team will put a plan in place to support a pupil if she is or is likely to be away from school, due to medical needs, for more than 15 working days.

Children with medical needs will remain on the school register. Attendance registers will be marked so that they show if a pupil is, or ought to be receiving education otherwise than at school.

The school will work in partnership with Parents/Carers and the EWO (Education Welfare Officer), when appropriate, to put a suitable package in place to support pupils who are absent with medical needs.

The Head of Year will liaise with school staff to provide appropriate work for the pupil. This may include conversations with the EWO and other relevant agencies.

The school will convene regular review and planning meetings involving the pupil, if appropriate, and their Parents/Carers and all professionals dealing with the pupil. These meetings will review progress, plan for the pupil's reintegration into school and outline clear responsibilities for all those involved.

Pupils will be given access to public examinations as appropriate, and the Deputy Headteacher will liaise with all relevant parties.

The school will pay examination fees, assess examination coursework and organise careers interviews as appropriate.

Pupils who are unable to attend school because of medical needs will be kept informed of school social events by newsletter. The school will consider the views of the pupil through discussions with her and her Parents/Carers.

8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' Healthcare Plans will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance.

9. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable training to do so.

The training will be identified during the development or review of Healthcare Plans. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

Training will:

- > Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils.
- > Fulfil the requirements in the Healthcare Plans.
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

10. Record keeping

Written records are kept of all medicine administered to pupils during the school day. Healthcare Plans are linked to student information in the school's management information system and can be accessed by staff.

11. Liability and indemnity

The school is a member of the Risk Protection Assurance through the Education Skills and Funding Agency.

12. Monitoring arrangements

This policy will be reviewed and approved by the Full Governing Body annually.

13. Links to other policies/procedures

This policy links to the following policies:

- > Accessibility plan
- > Complaints
- > Equality information and objectives
- > Medical Procedures Document
- > Health and safety
- > Safeguarding
- > Special Educational Needs Information Report
- > Pupils who cannot attend school due to a health need
